

Musical Trees Reflection

Congratulations on your hard work completing the Musical Trees programming assignment! It is a challenging assignment that requires a good understanding of memory and how to debug. For full credit, fill out the following reflection questions.

1. In your own words, describe how the algorithm worked to create melodies. Please use around 4 sentences.

2. What was an issue, bug, or point of confusion you encountered and how did you move past it?

3. List the vector of notes of your favorite ending melody. What do you like about it?

Read the following article on AI generated music,
<https://www.cmu.edu/news/stories/archives/2026/january/as-ai-generated-music-advances-humans-still-lead-in-creativity-cmu-research-finds>

1. List 3 big takeaways from this reading

2. How does this article relate and not relate to the Musical Trees project?

3. What are your thoughts on the future of music and how it should or should not incorporate technology.
