

Induction Activity: Video CV

Welcome to your journey into Computing! We hope you find your time with us fruitful, informative and (most importantly) fun. At the end of your course, you should be well equipped to find employment in this area...

...but what kind of job can you get?

Discuss with peers: 5 minutes

For today's activity, you are required to create a short video (max: 1-minute) which meets the following criteria – but feel free to be creative with the content!:

- Introduce yourself!
- Talk about any experience you have with computing
- Talk about how you hope this course can lead you to your desired job

You should feel free to record the video within the next few days in a way that is convenient to you: you can use your laptop, smartphone or tablet. As long as we can see and hear you, the quality of the video does not matter, and will not have an impact on the result of this submission.

Should you need it, please note that the lab PCs are equipped with webcams, which you can use for your recording. We also have some equipment available for loan – speak to your teaching staff for further information.

IMPORTANT: These videos are not made public, and will be only used for the purposes of this assessment.

Submission details: Please submit your one-minute video by the 27th September on CampusMoodle under the CM0000 Induction section. The Dropbox will accept files of up to 250Mb in size – if your video is larger, you may need to compress it. Speak to a member of teaching staff if you are unsure how to proceed.
